CONSUMPTION (WLTP CYCLE)*						
Consumption (l/100km) combined cycle min-max		7.1-7.5		5.7	5.7	5.8-5.9
CO <sub>2</sub> (g/km) (combined cycle) min-max		162-172		150	150	153-155

\* The data on fuel consumption and CO<sub>2</sub> emissions shown in the table are still DRAFT and may not be representative of CO<sub>2</sub> emissions and actual consumption, which depend on multiple factors relating, by way of example and not exhaustively, to the driver's driving style, weather and road conditions, status, the equipment and load of the vehicle.

Specifications are based on the latest product information available at the time of publication

Some features and/or applications may be late availability

Specifications and Prices are subject to change at any time without notice and do not bind the company in any way (15, February 2023)

The values indicated for fuel consumption and CO<sub>2</sub> emissions are measured by the manufacturer on pre-approval tests, according to the WLTP procedure (EU Regulation 2018/1832), and may be subject to modification depending upon the definitive homologation
